New Book Sparks World's First Professional Dreamer Week

February 16th-23rd will be officially Professional Dreamer Week, a worldwide celebration to help people utilize the principles outlined in the "Professional Dreamer" book to turn dreams into reality while raising funds for charity.

Written by Vancouver author Ghalil, ***Professional Dreamer*** is the impetus for the event and provides a step-by-step process for changing your outlook on life and achieving all that you've ever wanted. To be launched on Amazon.com February 16th 2006, *Professional Dreamer* is a must have book for anyone looking to improve their life situation. Clearly and beautifully written, the process of using thought energy to improve our life is easy to learn and even easier to practice. By simply changing how and what we think, positive life changing miracles can occur.

Professional Dreamer is based on a very simple concept - our thoughts, whether positive or negative - influence our life and the events which occur in it. By changing how we think and directing our thought energy towards our desired goals, we can achieve anything we desire. In *Professional Dreamer* this process of changing our thoughts and using thought energy is clearly outlined in six steps: *One-Pointed Thought, Desire, Trueprint, Visualization, Demonstration, Manifestation*. Each step is broken down into two parts, Principles and Method, allowing the reader to understand what each step is, how it works and why, as well as provide clear and practical steps for applying the theory to our day-to-day life. Interspersed with inspirational poetry and inspiring testimonials, *Professional Dreamer* is an easy read, beautifully laid out with life changing potential.

"I never believed it possible, but it works. This just works. Do yourself a favor. You deserve this book." said Ray Barnes, a very satisfied reader.

The Professional Dreamer Week is designed to teach people to embrace the notion that all dreams are valid and have the potential of becoming reality, and that we should celebrate our dreams. By visiting <http://www.professional-dreamer.com> during the week of Feb 16-23, visitors will receive a discount to the book, a talking ebook valued at \$40, and hundreds of dollars worth of bonuses in personal development materials.
